MEMORANDUM FOR: See Distribution

FROM: EO/ICS  
EA/ICSSUBJECT: Telephone Problems in  Building

STAT

1. There is a perception that the telephone system, especially secure, is becoming increasingly more "insecure" (i.e., bleed-through of other conversations), and more inoperable (just does not work).  is prepared to register our complaints with the CIA's DDA (Bill Donnelly); however, we need concrete examples and records to state and build our case.

STAT

2. From 31 August through 2 October you, and members of your organization, should keep a log (for both black and secure telephones) detailing any problems encountered. By 12 October, each Office, Committee, and Staff should submit a consolidated report to the undersigned that details your respective experiences, and we will compile an IC Staff response for D/ICS.

3. Thank you in advance. We will keep you advised.
